Caravan Double Glazing and our System

Our system is a cost effective alternative to upgrading your static caravan. We offer a unique uPVC double glazed window and door system developed especially for the static caravan and holiday home market, providing an alternative to expensive upgrading. Our system makes your caravan look brand new.

The slim system we use to replace caravan windows and doors is a cost effective alternative to upgrading your static caravan. Our a unique uPVC double glazed system was developed especially for the static caravan and holiday home market and provides a viable and cheaper alternative to expensive upgrading. Our system can make your caravan look brand new.

I personally come out to meet all my customers, go though individual window openings, and recommend the most suitable openings for your caravan. I will go through opaque glass options for doors and bathrooms in your caravan and complete a full and detailed survey.

Your new windows and doors are tailor-made to fit your caravan, your bespoke caravan windows and doors are individually balanced to your caravan, ensuring a perfect fit, and are air-tight and watertight.

Our windows fit all Static Caravan Walls, up to 50mm thick. The windows and the doors wrap around the openings by 19mm. This 19mm wrap-around, on all 4 sides, has a 6mm thick neoprene rubber foam tape attached (thicker 12mm tape is used for the Doors). The windows and doors are cramped into position, this crushes the tape, making an air and water-tight seal. Neoprene is the material used in wetsuits and as such is impregnable to water. The frames are then screwed into the existing window and door frame. The windows and doors are trimmed up. We do not use unsightly and messy sealants that degrade over time.

***** Prices currently reduced for all full fits! *****

This system is not suitable for Tourers!

No more drafts

Hi- tech design windows with a double-action bubble gasket offering a continuous seal, even around corners. Draughty windows are a thing of the past. Energy rated A+

Excellent insulation

Designed to achieve maximum thermal performance. Energy rated A+

No more condensation

Efficient windows, together with 28mm sealed Glazed units (the recognised standard).

Added security

Windows and Doors are Internally Glazed. All Handles and Locks are approved by the British Standards System, giving enhanced security and tested and awarded certification, by a Police-backed initiative

Reduced heating costs

Designed to retain more heat in your caravan, the reduction in heating costs will quickly pay for the overall installation. Energy rated A+

Low maintenance

Easy to clean, lead free, frames. Guaranteed for 10 years. Frames Guaranteed not to warp or sag. (Our competitor's frames do sag)

What our Customers' say about our Product and Service:

This system is not suitable for Tourers!

CLAI MAWR Park, Anglesey

On time, efficient and fitted in no time, I recommended him to a friend Val Hillier, on the same Park, Val was also so impressed, she asked Paul for a quote, accepted the price and Paul measured up on the same day!

Sothfield Caravan Park Brean

Amazing transformation, and a amazing job, many thanks Paul, from survey to fit you were professional, on time and extremely efficient, I will recommend you to everyone, no one could have done a better job.

Kinmel Bay, Rhyl

Paul has fitted our Third Van, this year, what a difference Double Glazing makes, no hesitation, Paul is efficient, and does an excellent job, we can now let our Vans out All Year!! A big thank you Paul.
